Hardware in this Box:

Bolts (100mm) x 8

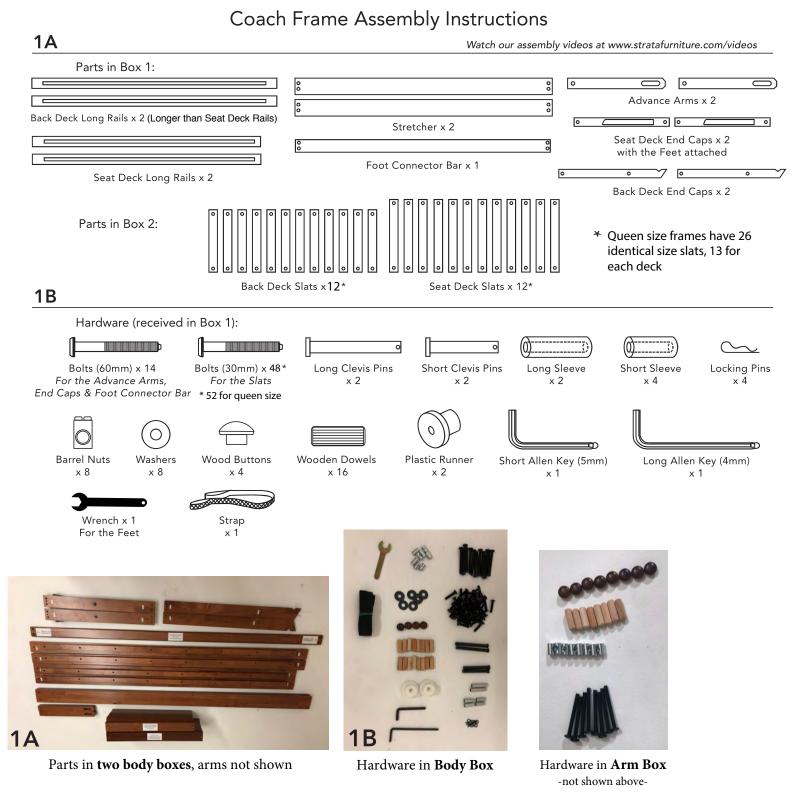

Wood Buttons x 8

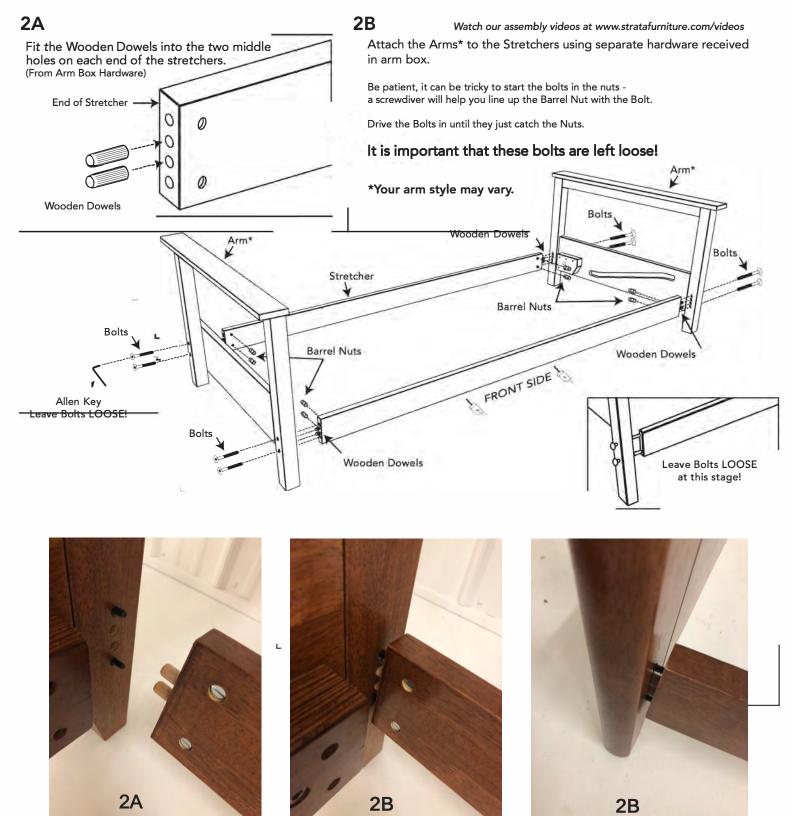

Thank you for purchasing one of our products! We hope the instructions below make the process go smoothly. We strive to have high quality products and perform numerous quality control steps to ensure all the hardware is provided and no issues occur during assembly. In the rare case something is missing, please contact us directly during business hours at (763) 786-3784 or after hours at (763) 592-9093. You can also reach us at info@stratafurniture.com. Also, if one of the steps below do not make sense and you need help figuring it out, we are more than glad to walk you through the assembly. We hope you enjoy your futon!

Operating Instructions

Watch our videos at www.stratafurniture.com/videos

To convert into a bed position

•Lift seat deck up just so it clears the front stretcher. PULL ONLY HORIZONTALLY and as LOW TO THE GROUND as possible until no longer possible, then lift front of deck vertical and inward toward back of frame. At this point, it will look like the picture. If you lift vertically too quickly, the frame will slam down.

•Resting the seat deck on your hip, push the seat deck and mattress forward (towards the back deck). Pull the foot connector bar towards you until feet are fully extended.

•Sit the frame down gently.

To convert into a couch position

•Remove any pillows and other obstructions

•Push up the mattress into an inverted couch position and then lift up the seat deck into a vertical position.

•Resting seat deck on your hip, push the foot connector down all the way so that the foot connector rests on the side rail and locks the foot connector bar in place.

•With one hand lightly push the seat deck down. Then, at the same time, pull on the top of the mattress with one hand (or the strap if using a strap) and push in the seat deck with your other hand or leg until it locks in.

*DO NOT FORCE! - Frame should operate easily.

Frame in bed position

Keep the feet snugly attached to the seat deck!

After pushing up the mattress, lift the seat deck into a vertical position.

Push the foot connector all the way in so that the foot connector rests on the side end caps and locks the feet in place.

PLEASE NOTE:

Temperature and humidity can affect the tightness of you frame. It is important to periodically check all connections for tightness. We have included a 13mm open-end wrench and a 5mm Allen-head key to use to keep the feet snugly attached to the Seat Deck End Caps for proper operation.

Note: Never lift the frame by the arm caps - Always lift from the bottom of the arms.

> Please see operating videos at www.stratafurniture.com

With one hand lightly push the seat deck down while pulling on the top of the mattress with the other hand or the strap and push the seat deck back and down until it locks in place.
